Projects

Virtual Host
https://github.com/taylormbruno/virtualHost | https://virtual-host.herokuapp.com/
Description: Collaborative MERN full-stack application to create an event management application to host your event or as a user to find events in your area.
- Created a responsive design using React.js with Semantic React UI
- Established user authentication using MongoDB, Mongoose ODM, and Passport.js
- Managed events and vendors created by a user using MongoDB and Mongoose ODM

Simple Eats
https://github.com/kaciehatley/simple-eats | https://kaciehatley.github.io/simple-eats/index2.html
Description: Collaborative client-side project to create a recipe search application.
- Developed filter search options using JavaScript and API calls and composed modals from Materialize CSS framework
- Generated functions using local storage to create user grocery lists

Weather Dashboard
https://github.com/taylormbruno/WeatherDashboard | https://taylormbruno.github.io/WeatherDashboard
Description: Independent client-side weather application that allows the user to search for a city and displays the current weather conditions and a 5-day forecast.
- Utilized local storage to save recently searched cities and display the five most recent cities searched

Experience

General Manager, MOD Pizza | Mooresville, NC | Aug 2018 - Aug 2019
- **Team Leadership:** Led a team of 20-25 team members and 3-4 supervisors
- **Team Building:** Trained the team per company standards to achieve a high level of customer service to meet metrics
- **Team Management:** Managed the team to receive low cost of goods and labor on a regular basis through training, inventory management, and running schedule audits.
- **Oral/Written Communication:** Communicated policy changes with team and upper management to keep store location up to date from Crew Members to District Managers

General Manager, Papa Murphys | Mooresville, NC | Oct 2011 - Feb 2018
- **Team Leadership:** Led a team of 10-15 team members and 1-3 supervisors
- **Team Building:** Trained the team per company standards to achieve a high level of customer service to meet metrics
- **Team Management:** Managed the team to receive the lowest cost of goods and labor on a regular basis through training, inventory management, and running schedule audits.

Education

Full Stack Coding Certificate - University of North Carolina; Charlotte, NC (April 2020)
